

# IFA

## INTRUSION FIRE AGENT 2023R1

# Take control of your security

Supervise and investigate your premises instantly

The screenshot displays the HEMIBLADE IFA software interface, which includes several key components:

- Top Dashboard:** Shows a summary for the panel "HIT XR150". It includes sections for "PANEL'S NAME", "DAYS CURRENT EVENTS COUNT", "ARMING STATE", and "NETWORK SUPERVISION ERRORS". Below this, there are three circular status indicators labeled "SYSTEM", "HEARTBEAT", and "USER".
- Left Panel:** Titled "PANELS PROGRAMED AREAS", it lists programmed areas with columns for "NO.", "AREA NAME", "ZONES", "TROUBLE", "OPEN", and "STATUS". A specific row for "GENERAL" is highlighted.
- Middle Panel:** Titled "AVAILABLE ZONES", it shows a grid of icons representing different zones. A specific zone, "PSI SUR SHK05", is highlighted.
- Bottom Left Panel:** Titled "AREAS ARMING STATE", it shows a table of zones with columns for "NO.", "ZONE NAME", "TYPE", "COUNT", and "STATUS". A specific row for "PSI SUR SHK05" is highlighted.
- Bottom Center Panel:** Titled "EVENTS RELATED TO SELECTED ZONE", it shows a table of events with columns for "TIME", "DESCRIPTION", and "STATUS". An event for "PSI SUR SHK05" is highlighted.
- Bottom Right Panel:** Titled "INSTANT VIDEO PLAYBACK OF EVENT", it displays a video stream from a camera labeled "HIT SWR AGS". The video shows a person walking through a room.
- Bottom Footer:** Shows compatibility with various systems: DMP, DSC, milestone, Nx Witness, DW spectrum, and Hanwha Techwin.

### VISOR DASHBOARD

This feature-rich dashboard sports easy-to-use functionality for incident investigation with granular precision and specific controls to arm-disarm intrusion and fire panels with visual assistance.

IFA IS COMPATIBLE WITH THE FOLLOWING SYSTEMS

The best solution for security panel supervision and instant video alarm confirmation is offered in two versions and a trouble-free subscription mode for your convenience.

PER DEVICE PER MONTH

PER DEVICE PER MONTH

IFA FORWARD

Forward panel messages to VMS for post processing.

- > Alarm panel integration.
  - > Panels live message monitoring.
  - > VMS integration.
  - > IFA System Dashboard.
  - > Panels messages log.

IFA STANDARD

All IFA Forward functionality plus the following.

- > VISOR Dashboards.
  - > Live and recorded video from related alarms.
  - > RTE Events.
  - > Panel live zone monitoring.
  - > Panel remote control (Arm, disarm, more).
  - > Arming assistant.
  - > Alarm history.
  - > Auto video download from related alarms.
  - > Multiple reports from panels and VMS.
  - > Manual video download.
  - > Optimized to display alarms on 4k monitors.
  - > Users privileges.
  - > Sessions administration.
  - > Users audit reports.
  - > Alarms notifications thru E-Mail and Telegram.
  - > More

UNIFIED SUPERVISION

A single clear, easy-to-read interface to learn for all your devices. No more individual programs for each device for you to deal with.

#### **NOTIFICATIONS RULES**

Configure rules to define who or which members of your team will receive what kind of notifications and by which method.

## **CRITICAL EVENTS**

All relevant information of all your systems on a single window. The IFA dashboard displays all critical events that require your attention.

RTE EVENTS

IFA receives in real time all panel events even if the panel is not armed. Real-time Events allow you to track sensor's activations for many purposes including investigation of incidents.

## **CONSOLIDATED REPORTING**

All your devices log in a single place with a friendly interface for report generation and data export. Your life just got easier.

REMOTE CONTROL

Arm, disarm, and silence local or sirens from your desktop with all the control and precision you need.

Device refers to a security panel, DVR or VMS.  
Prices are expressed in North American Dollars.  
Prices does not includes sales tax where it may apply.

Hemiblade is a conglomerate of veteran programmers dedicated to software development for system integration of different natures. IFA is a joint venture project of 3+ years of development between Hemiblade and Hyper Industrial Technology for security systems based on IP communication. IFA closes the gap to achieve instant video confirmation of alarm panel events.

Hemiblade is not proprietary of other commercial brands presented in this brochure. Those are the property of their respective owners.
